

Non-Numeric Score Entry

To enable non-numeric scoring in test definitions:

- Go to Admin > Define Assessments.
- Click Edit on the desired assessment definition.
- Select the relevant strand and score.
- Check "allow non-numeric scores".

The screenshot shows the 'Strands & Scores' configuration interface. It includes sections for 'Strand Info' and 'Score Info'. The 'Allow non-numeric scores' checkbox is highlighted with a red box. Other visible options include 'Are lower values better?', 'Lowest Score', 'Highest Score', 'Display Score on Student Profile', 'Display Score on Benchmark Score Entry Page', 'Score Ranges (Min/Max Values)', and 'Target Scores'.

Entries will be displayed in one-click reports, allowing scores to be sorted alphabetically. Additionally, please note that any modifications to test definitions will affect all sites to which the definition is assigned.
